Samuel Akolawole Olagoroye

Full-Stack Web Developer

+234 913 411 5254 | olagoroyesamuelakolawole@gmail.com | LinkedIn | Portfolio | Nigeria

Full-stack web developer with two years of production experience building and maintaining PHP and JavaScript-based web applications, including RESTful API design, CMS-style templating (Django/Laravel), and cross-team collaboration on live products. Comfortable working from business requirements through to implementation, that is building custom templates, content-driven pages, and integrations with a Git-based workflow (branching, pull requests, code review) and a strong eye for responsive, accessible UI. Experience mentoring junior developers and coordinating across frontend/backend teams on shared deadlines; eager to grow into larger-scale, standards-driven platform work.

CORE COMPETENCIES

- **Web Development:** PHP, HTML5, CSS, JavaScript (ES6+)
- **API & Data Integration:** REST APIs, JSON, XML, third-party integrations
- **Templating & CMS-style Systems:** Django templates, Laravel Blade, component theming
- **Responsive & Accessible UI:** Tailwind CSS, mobile-first, cross-browser compatibility
- **Version Control & Deployment:** Git, GitHub, branching/PR workflows, Netlify, cPanel
- **Backend & Databases:** Node.js/Express, PostgreSQL, MySQL, Drizzle ORM
- **Security:** Authentication flows, secure API design
- **Delivery Approach:** Requirement breakdown, iterative feature delivery
- **Mentoring & Training:** Guided junior developers through practical projects
- **Soft Skills:** Communication, problem-solving, cross-functional collaboration

EDUCATION

- **B.Sc. Computer Science | Federal University Oye-Ekiti, Nigeria** 2026

PROFESSIONAL EXPERIENCE

Fullstack Web/UI Developer, *Phos Consults Ltd, Nigeria* **Apr 2023 – Oct 2025**

- **Requirement-to-Delivery:** Translated stakeholder needs into a fully built consulting website, including a contact form integrated with backend email handling that reduced manual follow-ups by 25% and lifted client engagement by 15%.
- **Ownership & Iteration:** Owned the site over two years, using Git version control to ship updates, fixes, and content changes without downtime.

Software Development Intern (SIWES), *Nextswitch Ltd, Ibadan, Nigeria* **Aug 2025 – Sep 2025**

- **Templating & Backend:** Built and maintained page templates and components for MyRiteWallet and Dgnravepay using Django templates and Vue, focusing on consistent, reusable structure.
- **Team Git Workflow:** Collaborated with a development team using Git branching and pull requests to merge and review changes across two products, then deployed builds to Netlify and cPanel.
- **Mentoring:** Trained junior students in HTML and JavaScript fundamentals, guiding them through practical projects — early experience supporting less-experienced developers.

Backend Developer Intern, *Savertech Nig Ltd, Nigeria* **Aug 2024 – Oct 2024**

- **API Development:** Built and integrated RESTful APIs using PHP Slim, coordinating directly with frontend engineers to define clean data contracts and resolve integration issues.
- **Security & Performance:** Implemented secure authentication flows and optimised API response times across fullstack applications.

KEY PROJECTS

Quicklink — Full-Stack Web Platform | quicklink-three.vercel.app/

- **End-to-End Build:** Designed and built a complete web application (Next.js, PostgreSQL, Drizzle ORM) from requirements through deployment, including an authenticated dashboard, REST-backed data flows, and QR/PNG export features.
- **Quality & Testing:** Used Jest and React Testing Library to test core components, catching regressions during iterative development — similar in spirit to defect remediation on a delivery team.

Secret Share Express — Secure Data-Sharing Tool | securely-share-secrets.vercel.app/

- Built a client-encrypted data-sharing tool with Redis-managed link expiry, reflecting a security-conscious approach to handling sensitive data — relevant to work on federal platforms with strict data-handling standards.
