Samuel Akolawole Olagoroye

Full-Stack Engineer — Back-End Focus

+234 913 411 5254 | olagoroyesamuelakolawole@gmail.com | LinkedIn | Portfolio | Nigeria

Backend-leaning full-stack engineer with production experience across Node.js/Express APIs, MongoDB and SQL databases, and AI-integrated features. Comfortable owning backend architecture, data models, and third-party integrations (Firebase Auth & Storage, AWS S3, LLM APIs), while also shipping React UI to support product flows and internal tooling. I have shipped multiple full-stack projects end to end, from a MongoDB-backed team/task management API to an AI-enabled storefront using Google Genkit, with a focus on clean API contracts and reliability.

CORE COMPETENCIES

- **Backend Development:** Node.js, Express.js, RESTful API design
- **Databases:** MongoDB (schema & indexing), PostgreSQL, MySQL, Drizzle ORM
- **AI Integration:** LLM API integration, prompt handling, Google Genkit workflows
- **Auth & Storage:** Firebase Auth & Storage, AWS S3, secure authentication flows
- **Reliability:** Redis-based rate limiting & caching, environment/secrets config
- **Frontend (Supportive):** React, Next.js, Vite, Tailwind CSS
- **State & Data:** Data-fetching patterns, form handling, Context API
- **Version Control:** Git, GitHub, branching & pull request workflows
- **Testing:** Jest, React Testing Library
- **Soft Skills:** Ownership mindset, cross-functional collaboration, communication

EDUCATION

- **B.Sc. Computer Science | Federal University Oye-Ekiti, Nigeria** 2026

PROFESSIONAL EXPERIENCE

Software Development Intern (SIWES), *Nextswitch Ltd, Ibadan, Nigeria* **Aug 2025 – Sep 2025**

- **Backend Development:** Built backend features for MyRiteWallet and Dgnravepay, two fintech platforms, using Node.js/Express and Django alongside Vue on the frontend.
- **Team Git Workflow:** Collaborated with a development team using Git branching and pull requests, then deployed builds to Netlify and cPanel.

Backend Developer Intern, *Savertech Nig Ltd, Nigeria* **Aug 2024 – Oct 2024**

- **API Development:** Built and integrated RESTful APIs using PHP Slim, defining clean data contracts with a React frontend, and implemented secure authentication flows.

Fullstack Web/UI Developer, *Phos Consults Ltd, Nigeria* **Apr 2023 – Oct 2025**

- **End-to-End Ownership:** Designed and built the firm's consulting website from scratch, including a backend-integrated contact form that reduced manual follow-ups by 25% and lifted client engagement by 15%.

KEY PROJECTS

Team & Project Management System (MongoDB)

- **Data Modelling:** Designed MongoDB schemas for projects, tasks, users, comments, and activity logs, built around flexible document-based storage for a multi-team workflow.
- **API Design:** Built RESTful APIs for creating projects, assigning tasks, tracking status, and maintaining activity history across teams.

AI-Enabled E-Commerce Storefront | nextjs-full-storefront.vercel.app/

- **Auth & Storage:** Integrated Firebase Authentication and Firebase Storage for user accounts and product/media assets.
- **AI Integration:** Built AI-powered store features using Google's Genkit framework, connecting UI flows to backend AI logic.

Quicklink — Full-Stack Analytics Platform | quicklink-three.vercel.app/

- **Backend Architecture:** Built server-side redirect and analytics logic in Next.js Middleware, backed by PostgreSQL/Drizzle ORM, with Redis-based rate limiting on link creation and auth endpoints.
- **Reliability:** Added Safe Browsing checks, password-protected links, and hashed IP storage — built with data-handling discipline in mind.

Additional Projects

- AWS S3 File Storage App — file upload/management app using AWS S3 for cloud object storage. LLM-Powered Application — AI app integrating an LLM API for prompt-based responses, covering API integration and asynchronous request handling.
