Samuel Akolawole Olagoroye

Front End Engineer

+234 913 411 5254 | olagoroyesamuelakolawole@gmail.com | LinkedIn | Portfolio | Nigeria

Four-plus years of frontend engineering experience in React, most of it earned as the sole developer behind Phos Consults' website: built from scratch in 2023, still actively maintained today, and currently mid-migration onto Contentful CMS. TypeScript is the default now, and testing isn't an afterthought bolted on at the end; Jest and React Testing Library get used across recent projects, not just listed on a CV. The project list goes beyond typical practice work too, including a full analytics dashboard with live, real-time charts, an e-commerce storefront wired into Firebase Auth and Storage, and a MongoDB-backed project management tool built around its own REST API. A recent stint on a fintech team at Nextswitch added hands-on time with Django templates and Vue, enough to have a genuine feel for the Python side of a stack rather than a theoretical one. Looking for a product with real visual and real-time complexity worth digging into, with room to keep growing into Django along the way.

CORE COMPETENCIES

- **Frontend Development:** React, TypeScript, JavaScript (ES6+)
- **Styling & UI:** Tailwind CSS, responsive & accessible design
- **Testing:** Jest, React Testing Library, component/unit testing
- **API Integration:** REST APIs, form handling, authentication flows
- **Content & CMS:** Contentful CMS, Django templating
- **Version Control:** Git, GitHub, branching & pull request workflows
- **Backend Exposure:** Django (templating), Node.js/Express, PHP
- **Databases:** MongoDB, PostgreSQL, MySQL
- **Collaborative Delivery:** Works closely with product and design on shared features
- **Soft Skills:** Problem-solving, clear communication, ownership mindset

EDUCATION

- **B.Sc. Computer Science | Federal University Oye-Ekiti, Nigeria** 2026

PROFESSIONAL EXPERIENCE

Fullstack Web/UI Developer, *Phos Consults Ltd, Nigeria* **Apr 2023 – Present**

- **Frontend Ownership:** Built and have maintained the company's React-based consulting website since 2023, currently migrating content management onto Contentful CMS.
- **Feature Delivery:** Shipped a contact form integrated with backend email handling, cutting manual follow-ups by 25% and lifting client engagement by 15%.
- **Full-Stack Context:** Worked across a PHP/MySQL backend to keep frontend features properly wired to real data.

Software Development Intern (SIWES), *Nextswitch Ltd, Ibadan, Nigeria* **Aug 2025 – Sep 2025**

- **Frontend & Templating:** Built UI components and Django templates for MyRiteWallet and Dgnravepay, two fintech platforms, working alongside a Vue frontend.
- **Team Git Workflow:** Used Git branching and pull requests to collaborate with a development team, then deployed builds to Netlify and cPanel.

Backend Developer Intern, *Savertech Nig Ltd, Nigeria* **Aug 2024 – Oct 2024**

- **API Integration:** Built RESTful APIs with PHP Slim and worked directly with frontend engineers to keep API contracts clean and easy to integrate against.

KEY PROJECTS

Quicklink – Analytics-Driven URL Shortener | quicklink-three.vercel.app/

- **Real-Time UI:** Built an authenticated dashboard in React and TypeScript with live click and visitor charts, updating as new activity comes in.
- **Testing:** Covered core components, including the link-creation form and redirect logic, with Jest and React Testing Library.

AI-Enabled E-Commerce Storefront | nextjs-full-storefront.vercel.app/

- **Auth & Storage:** Integrated Firebase Authentication and Firebase Storage for accounts and product/media assets, built entirely in React.

Team & Project Management System (MongoDB)

- **Data & API:** Designed MongoDB schemas and REST APIs for projects, tasks, and activity logs, built around a real multi-team workflow.
